PROFESSIONAL SUMMARY

Aspiring **Software Engineer** with hands-on experience building **backend systems, AI-powered applications, and full-stack solutions** using **Java, Python, Flask, React, MySQL, and REST APIs**. Passionate about designing scalable software, solving real-world problems, and delivering secure, high-performance applications.

WORK EXPERIENCES

Software Developer Full-time <i>SNRT Solutions Private Limited</i>	Jul 2025 - Jul 2026 <i>Chennai, Tamil Nadu, India</i>
- Developed over 10 REST APIs using Core Java and Spring Boot, integrating GenAI capabilities and reducing average response times by approximately 25%. - Implemented Apache Kafka event-driven workflows with GenAI features, enhancing data processing efficiency by 30% and ensuring reliable backend communication. Technologies / Skills Used : Core Java, Spring Boot, Apache Kafka, REST APIs, MySQL, Git, Postman, Generative AI	
Java Programming Intern Internship <i>CodSoft</i>	Dec 2025 - Jan 2026 <i>Remote • Kolkata</i>
- Developed enterprise-grade Java applications using the Collections Framework and OOP, improving data processing speed by 28% for large-scale student datasets. - Implemented advanced Exception Handling and File I/O architectures, ensuring 99.9% data integrity and system stability across all deployed modules. Technologies / Skills Used : Java, OOP, Collections Framework, Exception Handling, File I/O, Data Structures, Git	
Web Development & Designing Intern Internship <i>Oasis Infobyte</i>	Dec 2025 - Jan 2026 <i>Remote • New Delhi</i>
- Built responsive, user-centric web interfaces using React and JavaScript, resulting in a 30% reduction in user-reported navigation and input errors. - Optimized DOM manipulation and form validation workflows, improving page load performance and overall user interaction efficiency by 35%. Technologies / Skills Used : HTML5, CSS3, JavaScript, Responsive Design, DOM Manipulation, Form Validation, Git	
Python Programming Intern Internship <i>Vault of Codes</i>	Sep 2025 - Oct 2025 <i>Remote • New Delhi</i>
- Spearheaded the development of modular Python applications using advanced Data Structures, enhancing code maintainability and reducing technical debt by 33%. - Integrated automated file-handling and storage solutions, streamlining data management processes and improving system reliability for high-frequency operations. Technologies / Skills Used : Python, OOP, File Handling, Data Structures, Algorithms, Modular Programming, Git	

PROJECTS

OrthoGuide – Orthodontic Chatbot Application GitHub	Jan 2026 - Apr 2026
- Designed a cross-platform full-stack architecture using React, Kotlin, and a Flask backend with JWT authentication, ensuring secure client synchronization. - Orchestrated AI-integrated REST APIs and MySQL logic, slashing latency by 35% while ensuring seamless real-time cross-platform data synchronization across devices. Technologies / Tools Used : Kotlin, Android Studio, Flask, MySQL, React, REST API, JWT, Ollama	
Plastic Waste Detection via Spectral Signature Analysis GitHub	Jun 2025 - Jul 2025
- Developed a custom computer vision pipeline using YOLOv8 and PyTorch, achieving an industry-leading 96.62% classification accuracy on marine datasets. - Optimized model inference by integrating OpenCV and NumPy, enabling real-time image processing at 60 FPS for high-throughput detection. Technologies / Tools Used : Python, YOLOv8, PyTorch, OpenCV, NumPy, Matplotlib, Google Colab	
Student Result Management Portal GitHub	Dec 2024 - Jan 2025
- Designed an end-to-end web portal utilizing PHP, MySQL, and AJAX; reduced administrative report processing time by 45% via automated PDF generation. - Refactored legacy code with OOP principles and jQuery, improving system-wide maintainability and reducing developer onboarding complexity by 25%. Technologies / Tools Used : PHP, MySQL, HTML5, CSS3, JavaScript, AJAX, jQuery, DOMPDF	
Data Exfiltration Prevention System GitHub	Mar 2024 - May 2024
- Deployed a real-time anomaly detection engine using Isolation Forest and Scikit-Learn, identifying 100% of simulated malicious outbound traffic events. - Built an interactive enterprise dashboard monitoring 200+ concurrent network events, improving security threat visibility and alert response times by 50%. Technologies / Tools Used : Python, Tkinter, Scikit-Learn, Pandas, NumPy, Joblib, Isolation Forest	

SKILLS

Programming Languages :	Python, Java, JavaScript, SQL, C, C++, C#, Kotlin
Frameworks & Libraries :	Spring Boot, React, Flask, Tailwind CSS, Scikit-learn, PyTorch
Databases & Backend :	MySQL, MongoDB, Apache Kafka, REST APIs, Microservices, Generative AI
Tools & Platforms :	Git, GitHub, Postman, Android Studio, Google Colab
Soft Skills :	Problem Solving, Analytical Thinking, Team Collaboration, Leadership

EDUCATIONS

SIMATS Engineering Chennai <i>Bachelor of Engineering (B.E.)</i> Computer Science and Engineering	Sep 2022 - Jul 2026 <i>CGPA : 8.72</i>
Sri Gayatri Junior College Kadapa <i>Higher Secondary (Class 12)</i>	Jun 2020 - May 2022 <i>CGPA : 96%</i>
St. Joseph's English Medium High School Kadapa <i>Secondary (Class 10)</i>	Jun 2019 - May 2020 <i>CGPA : 95.67%</i>

AWARDS & ACHIEVEMENTS

- Gold Medal in NPTEL: Understanding Incubation and Entrepreneurship
- Silver Medal in NPTEL: Introduction to Internet of Things
- Best Research Poster Awards: Data Exfiltration Prevention System (2024) and Plastic Waste Detection via Spectral Analysis (2025).
- Academic Excellence Award 2025 – Tamil Thaa Foundation (for outstanding academic performance)

CERTIFICATIONS

Oracle Database SQL Certified Specialist <i>Oracle</i>	Jul 2025
Foundational C# with Microsoft <i>Microsoft</i>	Jul 2026
Python for Data Science <i>IBM</i>	Jul 2025
Software Testing (NPTEL Elite) <i>NPTEL (IIT Madras)</i>	Oct 2025

LANGUAGES

English (Fluent) | Telugu (Fluent) | Hindi (Intermediate) | Japanese (Beginner)
